

Delete root 10 - merge(12, 15)

Merge Explanation:

Deleted root 10. Performed merge(12, 15).

12 remains root. We merge 12.right (20) with 15.

15 < 20 - 15 becomes parent. 20 becomes left child after swap.

left=17(0), right=15(1) - swap required.
